Total Number of People Served Through 2024

1.8M

Men, Women, and Children

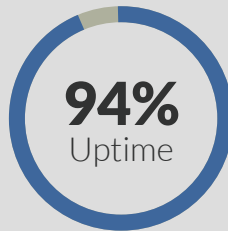

Once forgotten, the **people of Burundi** are now full of promise as, community by community, they are experiencing access to safe, clean water for the first time. Amazi Water has been providing **safe, clean water** to the people of Burundi since 2015, as a Christ-centered ministry. Amazi is Burundi's first and only in-country water organization with a mission to ensure every community has sustainable access to safe, clean water — we are on pace to serve **every community in the nation** by 2030.

Wells Year-over-Year

Our success is built on a foundation of spiritual focus, experienced staff, and the acquisition of state-of-the-art machinery and vehicles. It is a laser-focused vision, and a production-minded business with an NGO heart for the people. Our goals are enabled by the acceptance of the people and the Government of Burundi and the partnership of like-minded organizations.
